R&D Report – Energy Gel

Issue No: 01
Revision No: 00

Date of issue:
15/05/2026

1. PRODUCT OVERVIEW:

The increasing demand for clean-label, performance-driven nutrition has created a strong opportunity for natural energy solutions tailored to active lifestyles. This project focuses on the development of a 100% natural honey-based energy gel, designed to deliver quick and sustained energy, support hydration, and enhance athletic performance without causing energy crashes. Formulated with honey as the primary carbohydrate source, along with natural electrolytes and functional ingredients, the product aims to provide a convenient, single-serve solution (25–30g sachet) suitable for consumption during physical activity. The formulation strictly adheres to a clean-label approach, avoiding artificial additives, preservatives, colors, and flavors, while ensuring compliance with FSSAI regulations. This development bridges the gap between traditional natural ingredients and modern sports nutrition, offering a safe, effective, and culturally relevant alternative for athletes and fitnessconscious consumers in India.

2. KEY INGREDIENTS IN THE MATRIX:

Ingredient	Function
Raw Honey	Primary energy source (quick + sustained carbs)
Electrolyte Mix	Flavour , pH balance, electrolyte support
Pink Himalayan Salt / Sea Salt	Sodium for hydration and electrolyte balance
Natural Preservative	Citric acid
Ginger Extract	Aids digestion, reduces nausea

3. GENERAL HEALTH BENEFITS:

- Provides quick & sustained energy for workouts and daily activity
- Supports hydration with natural electrolytes
- Enhances focus and reduces fatigue
- Improves endurance and performance during exercise
- Supports digestion (natural ingredients like ginger, honey)
- Helps maintain electrolyte balance during sweating
- Clean energy source – no artificial additives or preservatives
- Easily digestible and gentle on the stomach
- Supports overall metabolic function
- Supports overall wellness (nervous system & metabolism)

4. Key Notes:

- ✓ 100% natural, no preservatives
- ✓ No refined sugar, no artificial additives
- ✓ Balanced glucose + fructose system (honey + dates) for better absorption
- ✓ Electrolyte support for hydration
- ✓ Suitable for 25–30g sachet format

5. WHY CHOOSE FLAVOR CATALYSTZ?

Key Reasons	Why Us
Industry Expertise	We bring deep industry knowledge and extensive experience across food, beverage, and flavor development sectors, ensuring informed and strategic solutions.
End-to-End R&D Solutions	Comprehensive research and development services from concept creation to final product launch, ensuring seamless execution at every stage
Innovative Solutions	Focus on creativity and innovation to develop unique, trend-driven, and market-ready products that stand out in competitive markets.

Compliance & Regulatory Support	Strong understanding of national and international regulatory frameworks to ensure products meet all safety, quality, and compliance standards.
Dedicated Expert Team	A skilled team of technologists, researchers, and industry professionals committed to delivering excellence and customized solutions.
Extended Services Beyond R&D	Support beyond product development, including process optimization, scale-up assistance, documentation, and technical guidance.
Commitment to Excellence	A strong focus on quality, precision, and continuous improvement to deliver superior outcomes for clients.
Partnering for Success	Collaborative approach that builds long-term partnerships, aligning with client goals to ensure mutual growth and success.
Customer-Concentric Approach	Tailored solutions designed to meet specific business needs, timelines, and market objectives.
Strong Value Proposition	Cost-effective, high-quality solutions that maximize return on investment while maintaining premium standards.
